

As of recent, the website of Soyjak.Party has had an issue I will diagnose as the "Too Little Boards Problem". To put it simply, too little boards take up the sites log, with little reason for the average 'teen to bother checking them. In this document, I will attempt to create a blueprint that could potentially create a full true-bloatist Sharty, primarily through the Infinite Board plan. I suggest at least skimming through parts 1-4, as they present the reasons behind why these boards made the final cut, and why infinite boards must be created; for example, if you wished to know why I decided on keeping /qa/, you would need to read part two of the document.

Sections:

Part 1: Boards as we know them: The neutral truth, the subjective, and the overboard

Part 2: The case of /q/: Some weird board

Part 3: The case of /g/: Why?

Part 4: The case of the too little boards

Part 5: The Infinite Board Plan

Part 6: Conclusion

==PART 1, BOARDS AS WE KNOW THEM==

As of current, soyjak.party contains 5 boards. Here I will outline each of them and attempt to understand the reasoning behind the addition of them.

...wordswordswords I know you don't care about any of this...

==PART 6: CONCLUSION==

I envision a better site, which can essentially operate as a true alternative to 4chan.

My plan is to make infinite boards. The boards will have every combination of every letter and number, so therefore, there is a board for everybody. Don't like how your board is sounding, then just go to another one! You don't have to wait for /poop2/ to exist, it already does! Same with /asudif0qejiotug87q349ewaiofnbu89uejqrwhabui932ji/. Just get to it!
